

## Agribusiness Students Field Trip at Sexing Technologies and Producers Cooperative

Twenty-five MAB students attended a field trip on November 4 to Sexing Technologies in Navasota and Producers Cooperative Association in Bryan.

MAB students with leaders of Sexing Technologies

Leaders from Sexing Technologies shared the company's history, accomplishments, and challenges they face. Students were also given a tour of their collection facility before splitting up into two groups.

MAB students at Producers Cooperative with Collin Hill, Warehouse Manager

When asked about the highlights of the visit to Sexing Technologies, second year student, David Salinas, said "The discussion on disruptive innovation was appropriate and very interesting since we had just completed a case study regarding this issue recently. Being able to apply the concept outside the classroom was extremely useful and eye opening."

One group of students left to tour Sexing Technologies' cow/calf ranch while a second group of students went to Producers Cooperative. Students toured the main store facility and warehouse of Producers Cooperative with Warehouse Manager, Collin Hill. Collin provided a history of the cooperative, how it interacts with its members and the challenges cooperatives face.

Thank you to Sexing Technologies and Producers Cooperative for your support of the MAB program!

## MAB T-Shirts Now on Sell

Have you ordered your [MAB T-shirt](#)? If not, time is running out, so place your order soon! Orders must be placed by November 29th.
